SOLUTIONS

Mission Statement

Our mission is to provide affordable and cost effective internet solutions to Small and Medium Enterprise.

Vision Statement

Taburu Solutions vision is to become a leading Information Communications Technology(ICT) solution provider.

Directors

About Taburu Solutions

Taburu Solutions is at the forefront in delivering Web-related technology through new design methodologies and tools to the Namibian market. The purpose of it all is to empower Namibian Website owners to take control and ownership of their online presence. While International organizations have complete customer relationship management systems online, Namibian Businesses mistakenly view a Website as just something 'to have', an expense without real reward. At Taburu Solutions we wish to change that perception. We wish to make the Small Medium Enterprise (SME) market aware that the Internet is a door that can open greater opportunities for them within the SADC Region and the whole World. We make it our core business to provide reliable and cost effective solutions to our clients at an attractive below the market price.

We have a team with over ten(10) years experience in the field of Information and Communcation Technology (ICT), that is capable of delivering high quality total Information and Communcation Technology (ICT) Solutions. We at Taburu Solutions believe in team work and with every day the quest for acquiring new competencies continues. Forever searching, experimenting, innovating solutions and creating opportunities where we can deliver reliable Information and Communication Technology (ICT) solutions.

Philosophy

We do not only offer reliable and cost effective products but we develop a long lasting relationship by offering a product that deos not compromise on quality.
